

FPL[®]

FPL SolarNow Program Community Based Solar Offering

SolarNow is a community based solar program dedicated to promoting and advancing solar energy in our communities

SolarNow Program

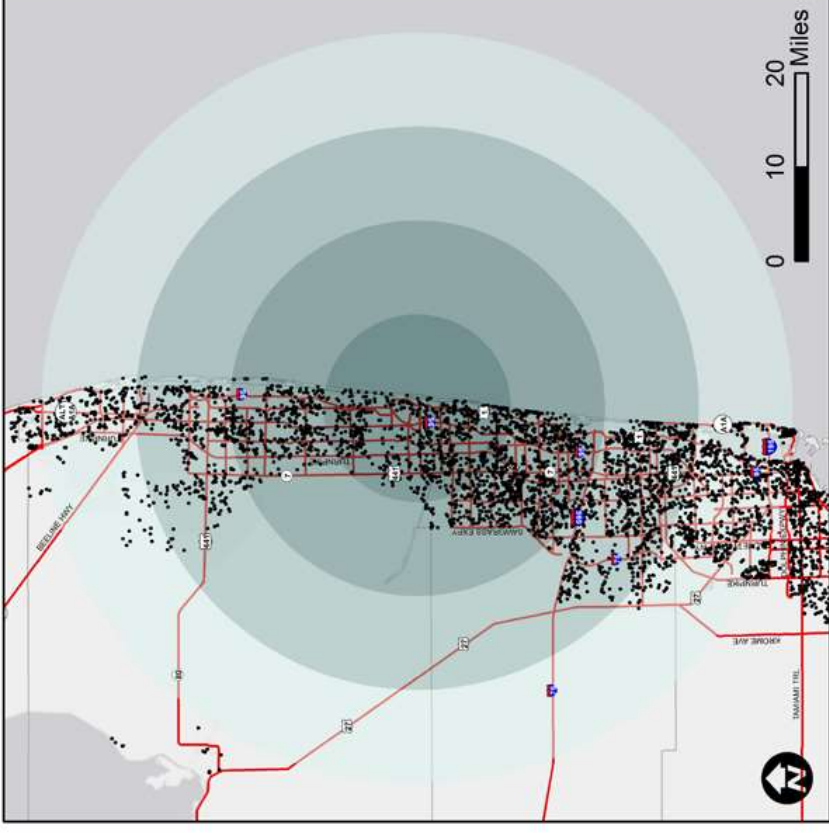

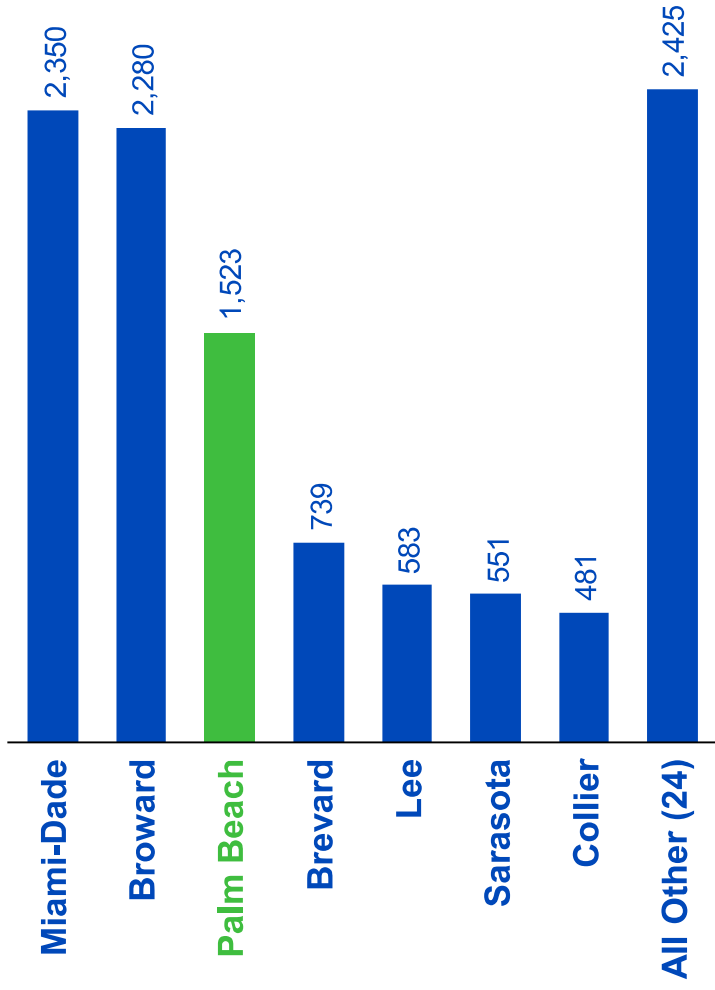

- Participants volunteer to contribute \$9/month
- FPL utilizes the funds to build, own, and operate solar
- Community hosts provide the space needed to support the generation
- Solar generation in the community drives awareness
- Enroll at: www.fpl.com/solarnow

SolarNow program brings the community together to fund, build and generate clean solar energy

Program is committed to deploying solar in communities where the participants live and where they come together as a community

SolarNow Program - Participation

SolarNow is a unique program, that offers everyone with the opportunity to participate in the growth of solar in our communities

SolarNow projects work best in pedestrian areas where people of all ages and interests come together

SolarNow Host Locations

Artist rendering

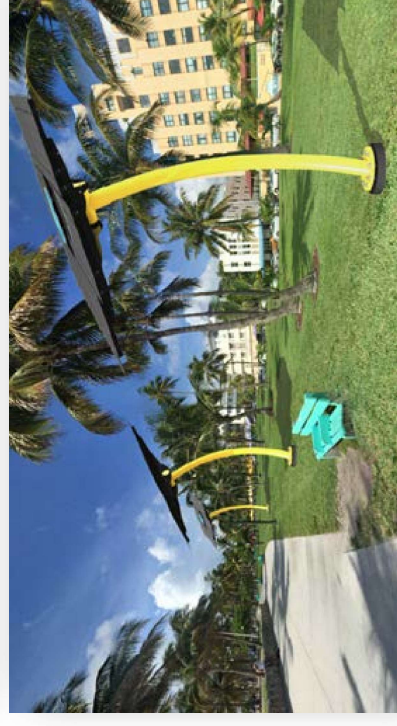

- Community locations of great civic pride
- Pedestrian friendly areas
- Open areas with limited shade

SolarNow projects showcase and inspire clean energy stewardship

SolarNow program brings beautiful solar structures to our communities

SolarNow SolarTree Overview

- **Spotlight's solar trees**
 - Progressive design
 - Thoroughly engineered for high wind loading
 - Simple kitted installation
- **2 models meet Florida building code**
 - Curve; 6 panels ~1.5 kW
 - Lift; 12 panels ~3.0 kW

Artist rendering

Solar structures create interest in open areas and work best in heavily trafficked pedestrian spaces with minimal shade

Appendix Slides

Two products meet the Florida building code and complement a variety of outdoor areas

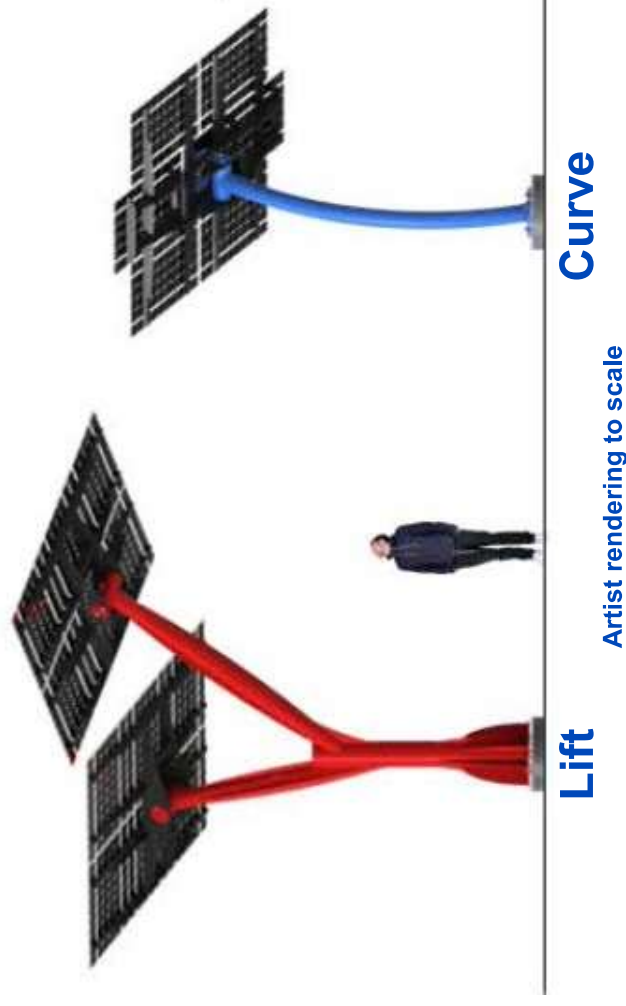

Solar Tree Products

Lift

- 20-25' tall
- 12 Lumos Modules: 3 kW
- Adjustable arms and arrays

Curve

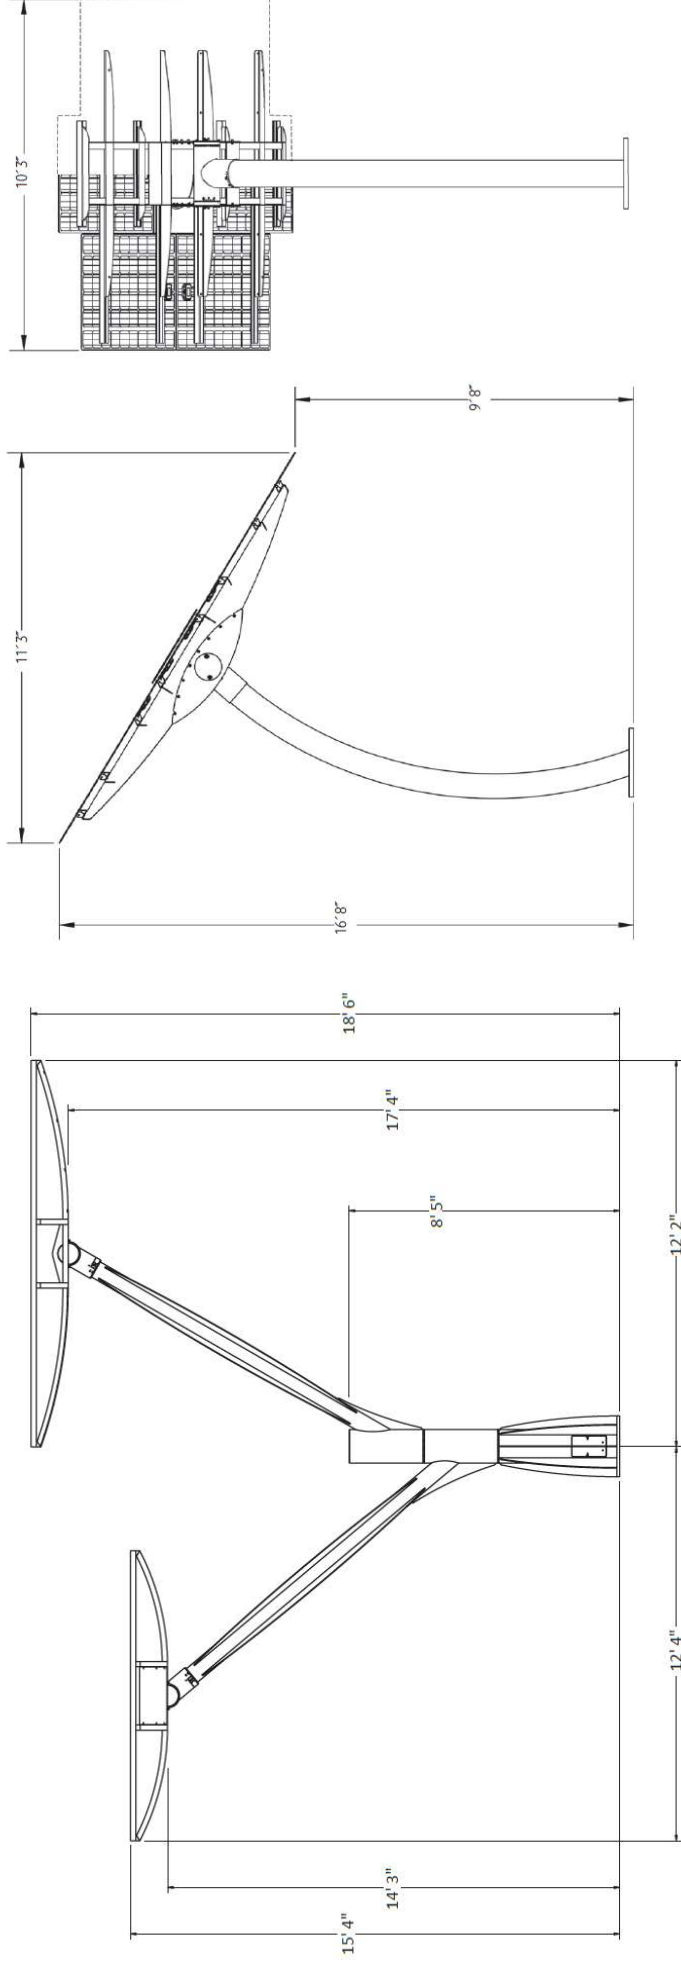

- 17-20' tall
- 6 Lumos Modules: 1.5 kW
- Adjustable arrays

The complete assembly (structure and array) for these products meet wind load ratings of 175 MPH

Curve and Lift dimensions can enhance interaction with solar trees

Spotlight Solar Products

Curve

Lift

Product dimensions should be taken into account when determining location of solar trees

Lift structures along the passenger drop-off at Manatee Lagoon create shade areas for visitors at the main entrance

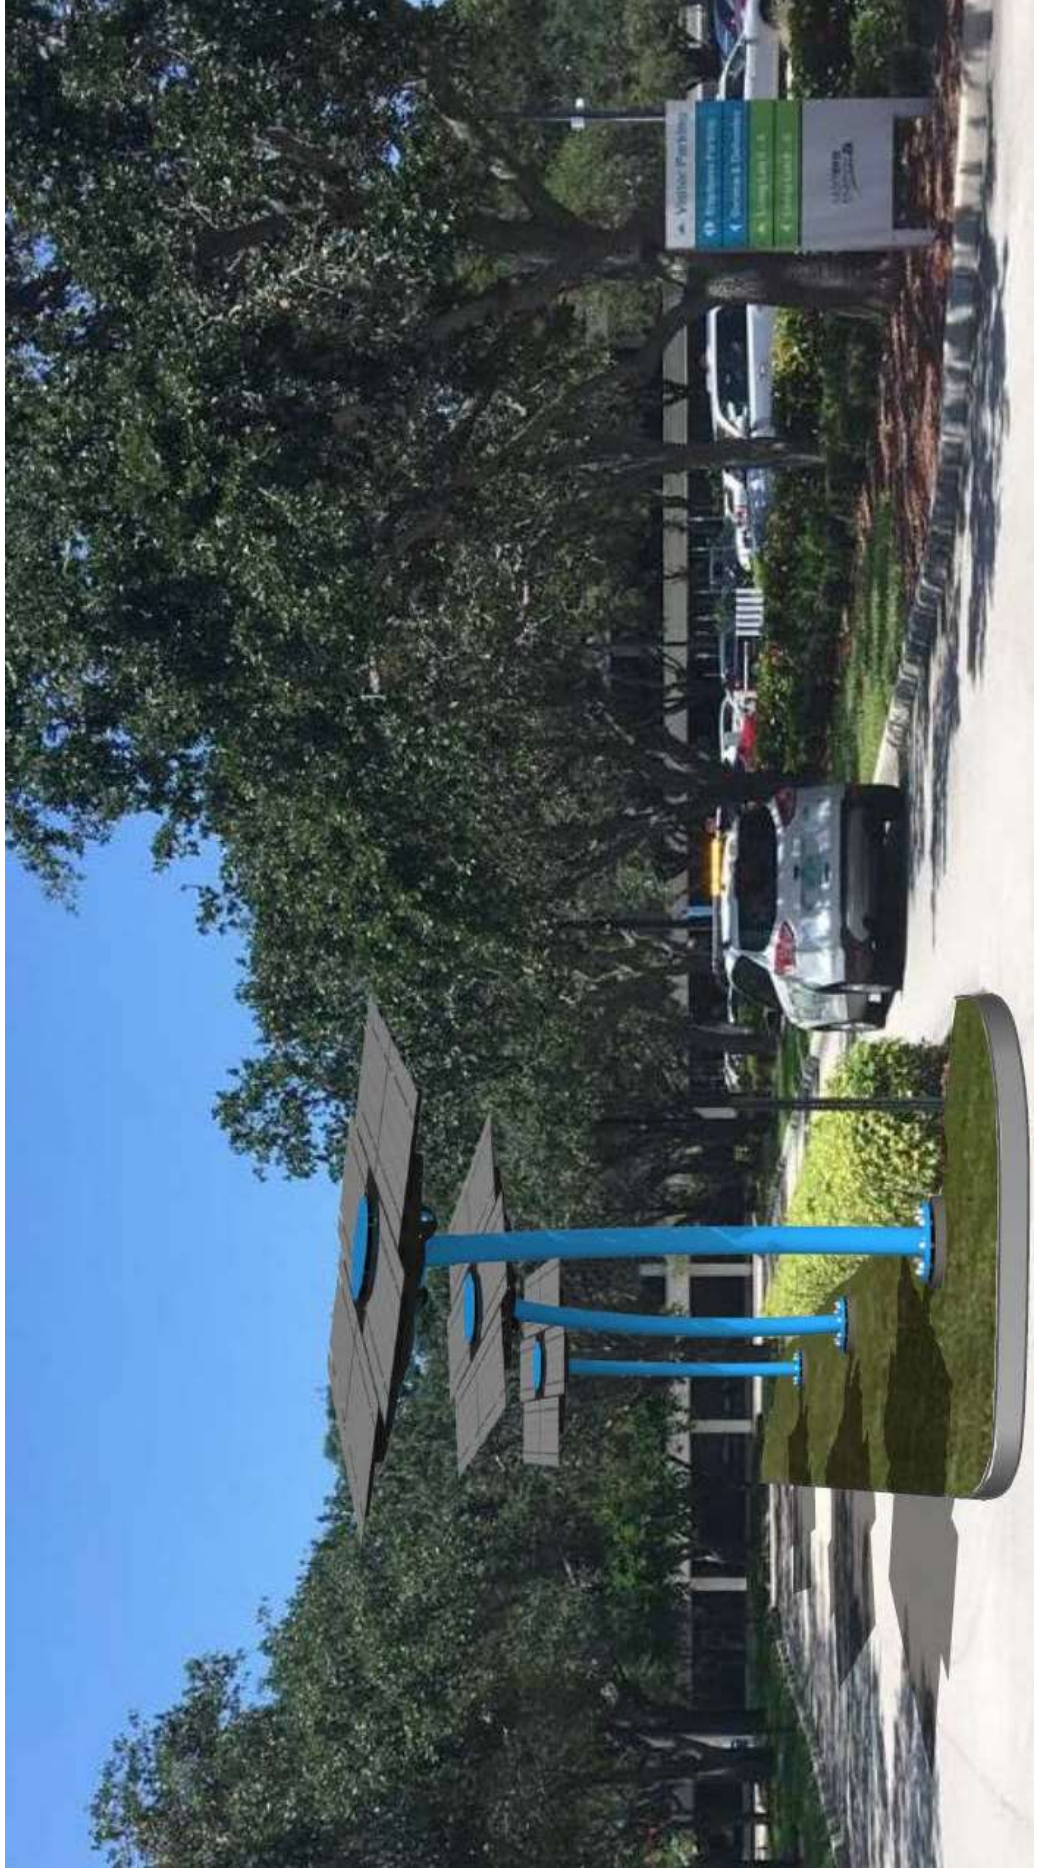

Manatee Viewing Center: 2 Lifts

Artist rendering, final design subject to mutual party approval

Curve structures along entry median greet employees and visitors

Juno Beach HQ: 3 Curves in Entrance Median

Artist rendering, final design subject to mutual party approval
Landscaping not to scale
