Re: Ocean Breeze East Site Work

Dear Mr. LaFontant,

I am writing this letter to inform you that the work performed under this permit is substantially complete, and all required inspections have been performed under my supervision. To the best of our knowledge and belief, the infrastructure was constructed in substantial compliance with the approved plans and said work was performed in accordance with the guidelines set forth in this permit. Please note that the ADA parking stalls have been relocated from their original locations on the approved plans. This field change was necessary to comply with the ADA standards for cross-slopes and run-slopes. Also, please note that the markings for the stalls on the paved area are a single line; which does not follow the standards of the City of Boynton Beach, but was approved as such.

I hereby certify to the construction completion of all the components of the site infrastructure for the above referenced project and that they have been constructed in substantial conformance with the plans and specifications approved by the City of Boynton Beach. Included with this certification letter is a complete set of closeout documents. (As-Builts/Densities)

Should you have any additional questions or require any additional information, please do not hesitate to contact me at 561-203-7503.

(Seal)
Brandon Ulmer, P.E.
